## Introduction

Brothers and Sisters,

This past year, our out-of-work lists remained at historic lows through the season. There is a tremendous amount of work throughout Local 150's jurisdiction, and with the training resources you have at your fingertips, there is no reason that any member should be struggling to get out to work.

If you are off this winter, make a plan to come down to the Training Center and get trained up on some new equipment. The more you can do, the less time you will spend looking for work. Whether it is brushing up your skills or taking a look at a brand new industry, there is almost nothing we can't provide you when it comes to skill advancement.

Local 150 members have a reputation for being the most skilled operating engineers in the nation, so do your part to keep that reputation up. Look through this catalog and find a class that you can take this offseason. When you become more skilled, you make our union stronger.

If you don't see what you need in these pages, call the Training Center and let the staff know. Our goal is to provide you everything you need to be the best operating engineer you can be, and we work very hard to do just that.

United We Stand, Divided We Fall.

**James M. Sweeney**

& Skill Improvement Program

# COVID - 19

## Policies and Procedures

Due to the COVID-19 (coronavirus) pandemic, the Local 150 ASIP Training Center is taking proactive steps to address several concerns regarding training and instruction. First and foremost, we want to maintain a safe workplace for our employees and a safe training atmosphere for our members.

The Local 150 ASIP Training Center will follow the recommendations of the Centers for Disease Control and Prevention (CDC) and the Illinois Department of Public Health (IDPH) while conducting business. Starting now, and during the upcoming training season, we will do our best to update all employees, members and visitors of current prevention strategies and policies in place and we respectfully request that everyone adhere to the current policy in place before entering the building to begin training. Your cooperation is greatly appreciated.

# Course Registration Information

Registration for this fall season will be limited to classes occurring within a 30-day period from the date that you call in to register. So for example; if you call in to register for a class on October 1st, you will only be able to register for classes starting in October through November 1st. This should alleviate a couple of issues at the site, one being the flood of calls that normally take place the first few weeks of registration and second being a reduction in the amount of no-shows that occur later in the season as members start to return to work or forget they signed up for a class three months prior.

ASIP is now offering online registration for a limited number of classes. Classes with prerequisites will not be available for online registration at this time. Please visit [www.asiplocal150.org](http://www.asiplocal150.org) to view our upcoming classes. Once you login, you can click on the “Member Services” link listed in the center of the main page where you will then find the “Classes” link. The classes available for online registration will have a “Register” link next to the number of open spaces in the class. Once signed up, you will receive an email confirmation as long as you have a valid email on file with the Apprenticeship Office. If you do not have an email address on file with the Apprenticeship Office, you will still be registered. If you are not able to attend class once registered, we please ask that you re-visit the site to cancel your registration or call us at 815-722-3201

## Training Site Policy and Usage Information

### Dress Code

All members using the training site must wear shirts with sleeves (long or short), no tank tops or sleeveless shirts, full length pants (no shorts) and work boots (no tennis shoes or dress shoes).

### Personal Protective Equipment

All members training outside of the classroom are required to bring their own hard hat, safety vest, and hearing protection.

### Equipment Sign Out Shifts

Machines are available for sign out two sessions or shifts per day, morning (7 a.m. – 11 a.m.) or the afternoon (11:30 a.m. – 3:30 p.m.).

All equipment must be signed in and out before and after each shift in the equipment sign out room located in the corner of the cafeteria.

### Equipment Reservations

Members may reserve equipment up to 30 days in advance.

You may reserve a machine for up to four shifts per week (16 total hours per week), once the four shifts have been met, you must reserve a different machine for the remainder of that week.

Reservations are held until 7:05 a.m. for the morning shift and 11:35 a.m. for the afternoon shift, these machines will be released for sign out after these times.

If you have a machine reserved and are running late, please call the Training Site at (815)-722-3201 and we will hold your reservation for up to 30 minutes.

If you have a reservation and will not be able to make it to the site that day, we ask you to call the Training Site and cancel your reservation, so another member can make use of that machine. Failure to cancel by phone will result in restrictions on future machine reservations.

## **Equipment Usage**

### **Pre-operation**

- Check all fluids and top them off if necessary. If you have any questions about proper fluids or levels, please ask an instructor.
- Grease all grease fittings, being sure not to over-grease.

### **Operation:**

- Please be careful climbing in and out of ditches.
- Be sure to back fill and level off your work area prior to exiting the field or arena at the end of your shift.
- Be sure to fuel the machine after operation unless otherwise told.
- If operating a tracked machine, please clean the tracks at the end of your shift.
- Please clean all garbage from the cab at the end of your shift.

## **Classroom Policies**

Please utilize the same dress code as stated earlier; you may be required to leave the classroom for the field for hands-on training or demonstrations.

Attendance will be taken; you will need to sign the attendance sheet next to your name.

Snacks, coffee, soda and water may be brought into the classroom, please refrain from bringing breakfast and lunch into the classroom (use the cafeteria). Please clean up after yourself if you bring these items into the classroom.

## **Classroom Walk-In Policies**

In order to maintain the best possible classroom and hands-on experience, class size has been limited. Once a scheduled class has been filled during registration, a waiting list will be created for that class. Those who wish may be put on this list. This waiting list will be used to fill slots opened by cancellations and no-shows. On the first day of class, attendance will be taken. If there are any openings for the class, they will first be filled with those present and on a waiting list, then by those waiting and not on a list.

Members on the waiting list will be listed in order by their sign up date and time.

## **Hotel Usage Policies**

All members who live 30 miles or more from the Training Site and are using the site for two full consecutive days (16 hours) or more are eligible to utilize a hotel arranged by us at our expense for the nights in between training days.

Upon checking into the hotel, you will be asked for a credit card. This is required by the hotel to be used for the coverage of incidental charges (telephone, damage, etc.). You will not be allowed to check in without one.

If you utilize a hotel and do not fulfill the two consecutive days (16 hours) of training, the full hotel bill will be billed to you.

## **Supervised Training**

The purpose of this training is to give the applicant the ability to gain hands-on experience through training with the supervisor.

It is the responsibility of the supervisor to stay with the applicant during the pre-operation checks, and advise on safety and operating techniques of the machine. This training is limited to skid steers, rubber tired loaders, small dozers and combination backhoes.

Equipment sign out is on a first come, first serve basis once all Journeyworkers and Apprentices have signed out. If you will be training out in the dirt field, you will need to see an instructor who will assign you a vehicle and a place in the field to train.

## **Cafeteria**

The cafeteria has reopened, there are also microwaves and vending machines for your convenience.

## **Speed Limit**

As a reminder, the speed limit on South Arsenal Road is 45 mph. Please adhere to this as it is enforced on a daily basis.

# IUOE International Training Site Travel Policies

## Class/Travel Registration

All class registration and travel will require prior approval of the ASIP POC and/or JATC Chairman.

Request must be submitted to the International's Travel coordinator through the ITRS website. (iuoe-itrs.org)  
All travel reservations will be booked through the I.U.O.E travel coordinator.

All flights will be booked at the most economical price for the fund and at the discretion of the I.U.O.E Travel Coordinator.

## Rental Cars, Personal Vehicles & Airport

### Shuttle

Rental Cars are not authorized for any travel for training at the I.T.C.C.

Personal vehicle use for travel is not authorized to the I.T.C.C.

Parking and Taxi (UBER/LYFT/RIDE SHARING) are not authorized and will not be reimbursed.

Travel to and from home airport is not reimbursed.

Shuttle service is provided at I.T.C.C.

## Flights, Baggage & Meals

Flight/seat (early bird check-in) upgrades will not be reimbursed.

Baggage fees will be reimbursed only on flights that do not include baggage in the air fare with original receipt for payment there will be no exceptions. Extra bag and overweight baggage fees will not be reimbursed.

Flights to attend training at I.T.C.C. are provided by the NTF (National Training Fund). Misappropriation of these funds are grounds for charges being filed against members of the I.U.O.E. Any member misappropriating funds will be directed to meet with the advisory board of their home district for the possibility of charges being leveled against them. (constitution Article XVI sec 3 and XXIV subsection 7 sec (e); local bylaws Article IX sec 6 (a)(c).

Meal expenses will not be reimbursed, all meals are provided by I.T.C.C.

# Member Education

## Labor Education\*

This program of study critically assesses the fundamental historical events, decisions, and developments which have shaped America's modern working class. The course contends that labor history is the conjunction of two dynamic struggles: the courageous efforts of individual working men and women to win dignity and security from their

employers, and the broader struggle of all working people to provide food, shelter, education, personal fulfillment and a sense of community for themselves and their families. The history of organized labor is about emancipating all people from oppression. Members will learn about the causes of these struggles, what forces were aligned against the working class, what techniques workers used to fight for justice and why these battles are important to understanding the role of organized labor in American society. Note: This class is not a replacement for the "Labor Studies & COMET 1" class put on in Countryside.

\* All apprentices must take Labor Ed 1, 2 & 3 to satisfy their apprenticeship requirements.

Level	Date	Start Time	Location
1	Oct. 15, 2022	11:30 A.M. - 2:30 P.M.	Auditorium
2	Oct. 22, 2022	8:00 A.M. - 11:00 A.M.	Auditorium

2	Mar. 11, 2023	8:00 A.M. - 11:00 A.M.	Auditorium
3	Mar. 11, 2023	11:30 A.M. - 2:30 P.M.	Auditorium

## Know Your Union

Know Your Union is a four-hour course designed to familiarize new and existing members with various aspects of Local 150, including organizational history, governance, hiring hall, training, benefits, and political activism. Note: Additional classes will be scheduled throughout the

year. Please visit: [www.local150.org](http://www.local150.org) or [www.asiplocal150.org](http://www.asiplocal150.org) for more information and class dates. Contact the District 1 Hall at (708) 482-8800 to reserve your spot in these classes.

Date	Start Time	Location
Dec. 17, 2022	8:00 A.M.-Noon	District 1 Hall
Jan. 28, 2023	8:00 A.M.-Noon	District 1 Hall
May 6, 2023	8:00 A.M.-Noon	District 1 Hall
Jul. 22, 2023	8:00 A.M.-Noon	District 1 Hall

## Labor Studies & COMET 1 \*

COMET stands for Construction Organizing Membership Education Training, and helps members understand why organizing is central to maintaining bargaining strength. It generates membership support and encourages rank and file participation in the Local's organizing efforts.

Date	Start Time	Location
Oct. 15, 2022	8:00 A.M.-10:00 A.M.	ASIP (COMET Only)
Dec. 3, 2022	8:00 A.M.-10:00 A.M.	ASIP (COMET Only)
Jan. 21, 2023	8:00 A.M.-12:00 P.M.	District 1 Hall
Mar. 4, 2023	8:00 A.M.-12:00 P.M.	ASIP (COMET Only)
Apr. 29, 2023	8:00 A.M.-12:00 P.M.	District 1 Hall
Jul. 15, 2023	8:00 A.M.-12:00 P.M.	District 1 Hall

Labor Studies is a thorough review of the history of the American Labor Movement, including its successes and failures in the past and the challenges that lie in the future. **Note:** Additional classes will be scheduled throughout the year. Please visit: [www.local150.org](http://www.local150.org) or [www.asiplocal150.org](http://www.asiplocal150.org) for more information and class dates. To reserve your place at these classes, contact the District 1 Hall at (708) 482-8800.

**\* The Labor Studies portion of this class does not have to be taken by apprentices to satisfy their apprenticeship requirements.**

## First Aid

**American  
Red Cross**

## Standard First Aid, CPR, AED

In this 8-hour class you will learn how to respond to common first aid emergencies including: burns, cuts, head, neck injuries, back injuries and more. In the CPR and AED portion, you will learn how to respond to cardiac and breathing emergencies in adults, including the use of an automated external defibrillator (AED). There is an emphasis on hands-on learning in this course and after successfully completing it, members will receive a certification card that is valid for two years.

Date	Start Time	Location
Nov. 21, 2022	7:00 A.M.	2129
Dec. 19, 2022	7:00 A.M.	2129
Jan. 30, 2023	7:00 A.M.	2129
Feb. 27, 2023	7:00 A.M.	2129
Mar. 4, 2023	7:00 A.M.	2129
Mar. 11, 2023	7:00 A.M.	2129

# Safety Instruction

## OSHA 10-Hour Safety Awareness

This course will help members recognize and control a variety of safety and health hazards frequently found in today's workplace. Contractors are recognizing the value of this training and some job sites may require this for entry. This class is a prerequisite to the OSHA 30 and Disaster Site Worker classes. Please check the start time for the class that you're interested in taking. The classes will either run 8:00a.m. - 2:30p.m. for two consecutive days or 6:00p.m. - 10:00p.m. the first night then 7:00a.m.- 3:30p.m. the next day. **Note: 40 member max per class.**

Date	Start Time	Location
Nov. 1-2, 2022	7:00 A.M.	2110
Nov. 29-30, 2022	7:00 A.M.	2110
Dec. 6-7, 2022	8:00 A.M.	1051

Feb. 7-8, 2023	7:00 A.M.	2110
Feb. 14-15, 2023	7:00 A.M.	2110
Mar. 7-8, 2023	7:00 A.M.	2110
Mar. 14-15, 2023	7:00 A.M.	2110
Apr. 4-5, 2023	7:00 A.M.	2110
Apr. 20-21, 2023	8:00 A.M.	1051

## OSHA 30-Hour Safety Awareness

The OSHA 30-Hour course is a five day course with the intent of assisting employers in training and introducing operators to the basic practices of identifying, reducing, eliminating, and reporting hazards associated with their work.

There will be formal classroom instruction,

quizzes, short presentations as well as hands-on exercises addressing hazard recognition. Satisfactory completion of the course requires full attendance and a passing score on the final exam. Participants are required to have a valid OSHA 10-Hour Construction card to enroll in class and must present card to instructor on first day of class.

Date	Start Time	Location
Feb. 20-24, 2023	7:00 A.M.	1051
Mar. 27-31, 2023	7:00 A.M.	1051

## 40-Hour Hazardous Material Awareness

This course prepares operators to work safely and effectively with hazardous materials on and off hazardous waste sites. The 40-hour Hazardous Materials Awareness and Certification Course is required of everyone working on a Haz-Mat job. Attendance is required for all 40 hours of training. Members must be clean-shaven to participate in respirator training. Members who successfully complete this course will be notified and scheduled every year for the mandatory 8-hour refresher. **Note: 18 member max per class.**

Date	Start Time	Location
Nov. 7-11, 2022	7:00 A.M.	1051
Dec. 5-9, 2022	7:00 A.M.	1051
Jan. 16-20, 2023	7:00 A.M.	1051
Feb. 13-17, 2023	7:00 A.M.	1051
Mar. 6-10, 2023	7:00 A.M.	1051
Apr. 3-7, 2023	7:00 A.M.	1051

## 8-Hour Hazardous Material Refresher

OSHA regulations require that graduates of the 40-hour Haz-Mat classes attend an annual 8-hour Haz-Mat refresher. Haz-Mat refresher training is scheduled on Saturdays and is held at the Training Site and at several of the District Halls. Local 150 Haz-Mat graduates are notified by mail of their scheduled refresher class a few weeks before their certificate expiration date. Haz-Mat refresher classes review the key components of the Haz-Mat 40-hour training, provide the opportunity to discuss various aspects of the Haz-Mat work in our jurisdiction, and examine new and developing technologies in the Haz-Mat workplace.

Date	Start Time	Location
Nov. 5, 2022	7:00 A.M.	Auditorium
Dec. 10, 2022	7:00 A.M.	District 5*
Jan. 7, 2023	7:00 A.M.	District 4*
Jan. 21, 2023	7:00 A.M.	District 7*
Feb. 4, 2023	7:00 A.M.	District 1*
Feb. 4, 2023	7:00 A.M.	District 8*
Feb. 25, 2023	7:00 A.M.	District 6*
Mar. 4, 2023	7:00 A.M.	District 3*
Mar. 25, 2023	7:00 A.M.	District 2*

## OSHA Disaster Site Worker

This course is intended for Disaster Site Workers who provide skilled support services ( e.g., utility, demolition, debris removal, or heavy equipment operation ) or site clean-up services in response to a disaster. During this 2 day course, we will satisfy the FEMA requirements for ICS-100, ICS-200 and NIMS-700 courses as well as OSHA #7600 Disaster Site Worker. Because this course does not cover in detail safety and health hazards that occur on a daily basis on a normal construction site, completion of the OSHA Construction Outreach Training Course ( 10-hour ) is a prerequisite.

Date	Start Time	Location
Dec. 12-13, 2022	7:00 A.M.	1051
Jan. 25-26, 2023	7:00 A.M.	1051
Feb. 27-28, 2023	7:00 A.M.	1051

## Confined Space Awareness

This 2-day course involves both classroom instruction and hands on training. During the classroom portion, instructors will cover topics associated with both non-permit and permit required confined spaces. Members will also receive instruction on OSHA standards such as Control of Hazardous Energy, Air Monitoring and Fall Protection. During hands on training, members will safely enter multiple confined spaces using proper procedures to carry out the necessary work to be performed. Class size will be limited to 15 members. There are no prerequisites required to take this class.

Date	Start Time	Location
Jan. 5-6, 2023	7:00 A.M.	1051

## Mobile Elevated Work Platform

During this 2-day course, members will learn OSHA and ANSI standards related to the safe operation of Mobile Elevated Work Platforms (MEWP). Some examples of a MEWP are truck mounted boom lifts, scissor lifts and bucket trucks. Upon successful completion of the classroom portion, members will be tested on 3 different classes of MEWP's. After fulfilling all requirements, members will receive an accredited Powered Access License (PAL) card from the International Powered Access Federation that is valid for 5 years. Class size will be limited to 12 members. There are no pre-requisites required to take this class. Note: Members looking to renew their PAL license should call and make an appointment at the training site before their license expires.

Date	Start Time	Location
Oct. 31-Nov. 1, 2022	7:00 A.M.	1051
Nov. 21-22, 2022	7:00 A.M.	1051
Dec. 27-28, 2022	7:00 A.M.	1051
Feb. 1-2, 2023	7:00 A.M.	1051
Mar. 20-21, 2023	7:00 A.M.	1051

## OSHA Powered Industrial Truck (PIT)

OSHA regulations require that all powered industrial truck operators are trained, evaluated and certified before they operate a forklift. This two-part course covers training requirements. The first part involves classroom instruction in the form of lecture, discussion, videos and a multiple choice test. Members must achieve a passing score of 80 percent or higher. The second part of the training requirement is applied during a practical exercise which involves testing on an electric forklift, two LPG industrial forklifts and a rough terrain forklift. This training allows the members to obtain four out of the seven classes of industrial powered trucks on their training card.

The member will be evaluated and certified by the employer in accordance with the OSHA standard.

Date	Start Time	Location
Oct. 31, 2022	7:00 A.M.	2111
Nov. 28, 2022	7:00 A.M.	2111

## BROKK - Level 1

This 16-hour course will give a basic understanding of machine set-up, maintenance, operating control functions, power cable tending, use of attachments and maneuvering techniques that the operator will need for remote HAZWOPER and demolition work environments. Designed for high performance demolition at a compact scale. OSHA requires employers to seek out and incorporate new technologies on hazmat jobsites. This machine uses remote control technology to reduce employee exposures to hazardous job conditions. Upon completion of this course, members will obtain the ability to schedule individual training with the BROKK remote excavator.

Note: Individual BROKK training after completion of the Level 1 course by appointment only. Call equipment checkout to make a reservation.

Date	Start Time	Location
Dec. 19-20, 2022	7:00 A.M.	1051
Jan 30-31, 2023	7:00 A.M.	1051
Feb. 23-24, 2023	7:00 A.M.	1051

## Mine Safety

### MSHA Surface New Miner

The MSHA Training Plan Part 48, Subpart B that Local 150 ASIP has filed with MSHA covers surface metal non-metal mining and is accepted by MSHA to cover Part 46 training since Part 48, Subpart B training is a higher standard than Part 46. A requirement of the mine training plan is that any new employee designated as a non-experienced miner must receive 24 hours of new miner training to work at a mine site. Training must include instruction in safety and health subjects that are relevant to mining operations. The company you go to work for must supply you with all site specific and task training under Part 46 or Part 48, Subpart B before you start work. All experienced miners must receive 8 hours of refresher training each year to continue working at a mine site. **Note: 18 member max per class.**

Date	Start Time	Location
Dec. 5-8, 2022	7:00 A.M.	2129
Jan. 9-12, 2023	7:00 A.M.	2129
Feb. 6-9, 2023	7:00 A.M.	2129
Mar. 13-16, 2023	7:00 A.M.	2129
Apr. 3-6, 2023	7:00 A.M.	2129

## MSHA Surface Refresher

The MSHA Training Plan, Subpart B Local 150 ASIP has filed with MSHA covers surface metal non-metal mining and is accepted by MSHA to cover part 46 training since Part 48, Subpart B training is a higher standard than Part 46. A requirement of the mine training plan is that any employee designated as an experienced miner must receive 8 hours of refresher training each year to work at a mine site. Refresher training must include instruction on the following: safety and health subjects that are relevant to mining operations. You must have proof of prior MSHA training to attend this class. A 24-hour New Miner certificate, or a refresher certificate will be accepted as proof that you are a experienced miner. The company that you go to work for must supply you with all site specific and task training under Part 46 or Part 48, Subpart B before you start work.

Date	Start Time	Location

## MSHA Underground New Miner

The MSHA Part 48 A Underground training plan Local 150 ASIP has filed with MSHA covers underground metal and non-metal mining and has been accepted by MSHA to train underground new miners. A requirement of the mine training plan is that any new employee designated as a non-experienced miner must receive 40 hours of underground new miner training to work at an underground mine site, 8 hours of which must be at an underground mine. The final 8 hours of this class will be underground at a local underground limestone mine. After taking this class and having 12 months experience, you will be considered an experienced underground miner by MSHA. The company that you go to work for must supply you with all site specific and task training before you start work. All experienced underground miners must receive 8 hours of underground refresher training each year to continue working at an underground mine site. *Prerequisites:* MSHA Surface New Miner or an up to date MSHA Surface Refresher. **Note: 15 member max per class.**

Date	Start Time	Location
Dec. 12-16, 2022	7:00 A.M.	2129
Jan. 16-20, 2023	7:00 A.M.	2129

# Pipeline Industry

## Introduction to Pipeline and Gas Distribution Systems

This 40-hour class is intended to allow members to develop the skills necessary for employment in the pipeline and gas distribution industries. This course will be taught by experienced pipeline operators and will include hands on field exercises which will allow our members to become more employable in these industries. **Note: 15 member max per class.**

Date	Start Time	Location
Nov. 14-18, 2022	7:00 A.M.	2121
Dec. 5-9, 2022	7:00 A.M.	2121
Jan. 2-6, 2023	7:00 A.M.	2121
Jan. 23-27, 2023	7:00 A.M.	2121
Apr. 10-14, 2023	7:00 A.M.	2121

## Pipeline Sideboom Techniques

This 40-hour Pipeline sideboom class offers our members the opportunity to develop the skills necessary for sideboom work on a pipeline spread. Hands-on instruction by experienced pipeliners will concentrate on the development of skills such as catching your drift, carrying joints of pipe, carrying sections, carrying concrete coated pipe, general machine control, etc. *Prerequisites:* 500 or more pipeline work hours or previously taken Pipeline, Pipeline Oiler, Introduction to Gas Distribution or Introduction to Pipeline and Gas Distribution Systems courses. **Note: 3 member max per class.**

Date	Start Time	Location
Feb. 6-10, 2023	7:00 A.M.	2121
Mar. 6-10, 2023	7:00 A.M.	2121

## Pipeline Excavator Techniques

This 40-hour Pipeline Excavator class offers our members the opportunity to develop the skills necessary for excavator work on a pipeline spread. Hands-on instruction by experienced pipeliners will concentrate on the development of skills such as digging ditch, bell holes, excavating near live lines, digging road approaches, handling of matts, etc.

*Prerequisites:* 500 or more pipeline work hours or previously taken one of the following classes: Pipeline, Pipeline Oiler, Introduction to Gas Distribution or Introduction to Pipeline and Gas Distribution Systems.

**Note: 6 member max per class.**

Date	Start Time	Location
Nov. 28 - Dec. 2, 2022	7:00 A.M.	2121
Feb. 6-10, 2023	7:00 A.M.	2121
Mar. 6-10, 2023	7:00 A.M.	2121

## Mass Dirt, General Underground, Excavation & Demolition

## Introduction to Sewer and Water Principles

This class was designed for the operator with experience on an excavator or track loader, who is interested in how these machines are utilized in the Sewer and Water industry. Topics to be covered in this class are: working with trench boxes, stone misers, laying sewer pipe, safety habits and materials common to the sewer and water industry, as well as some basic blueprint and plan reading. This class will be a blend of classroom lessons and discussion,

all of which will be backed up with hands-on exercises in the field. *Prerequisites:* Excavator or Track Loader proficiency or completion of the Introduction to Excavator class. Members attending this class must attend all classroom activities in order to move on to the hands-on portion of the class. Members should be proficient on an Excavator or Combination Backhoe before attending this course.

**Note: 8 member max per class.**

Date	Start Time	Location
Nov. 14-18, 2022	7:00 A.M.	1133
Dec. 5-9, 2022	7:00 A.M.	1133
Jan. 9-13, 2023	7:00 A.M.	1133
Jan. 30-Feb. 3, 2023	7:00 A.M.	1133
Mar. 20-24, 2023	7:00 A.M.	1133
Apr. 3-7, 2023	7:00 A.M.	1133

## Basement Digging

This 40-hour class is intended for the experienced excavator or track loader operator interested in learning how to dig residential basements. This class will cover blueprint reading, setup and use of a laser, layout, placement of spoils, and excavation. You can expect a blend of classroom and hands-on training. Members must be proficient on an excavator to attend this class. **Note: 8 member max per class.**

Date	Start Time	Location
Nov. 28 - Dec. 2, 2022	7:00 A.M.	1140
Mar. 27 - 31, 2023	7:00 A.M.	1140

## Introduction to Skid-Steer Loaders

This 40-hour class will focus on the basic fundamentals of a skidloader. In this class, members will learn the different control patterns, use a variety of different attachments, load trucks and also cut grade for a sidewalk and/or driveway. Also, members will practice loading and unloading their machines and attachments onto and off of a trailer. Through approximately 8 hours of lecture in the classroom and 32 hours hands-on learning in the seat of a machine, this class will try to duplicate multiple real world scenarios. No testing will be done during this class. **Note: 8 member max per class.**

Date	Start Time	Location
Oct. 31-Nov. 4, 2022	7:00 A.M.	1140
Nov. 28-Dec. 2, 2022	7:00 A.M.	1140
Jan. 2-6, 2023	7:00 A.M.	1140
Jan. 16-20, 2023	7:00 A.M.	1140
Jan. 30-Feb. 3, 2023	7:00 A.M.	1140
Feb. 27-Mar. 3, 2023	7:00 A.M.	1140
Apr. 3-7, 2023	7:00 A.M.	1140

## Introduction to Dozers

This class is designed for the beginning dozer operator. This course teaches pre-operational checks and inspections, safety, develops familiarity with control functions, basic dozer techniques including slot dozing, v-ditches, proper traveling speeds, cuts and fills, striping and stockpiling, and backfilling of trenches. This course will also include basic grade stake reading and a small amount of slope work. **Note: 8 member max per class.**

Date	Start Time	Location
Jan. 9-13, 2023	7:00 A.M.	1142
Jan. 23-27, 2023	7:00 A.M.	1142
Feb. 6-10, 2023	7:00 A.M.	1142
Feb. 20-24, 2023	7:00 A.M.	1142

## Intro to Demo Attachments & Material Processing

This 40-hour class is designed to provide our members with the next level of machine control and skill level. Through approximately 8 hours of lecture in the classroom and 32 hours hands-on learning in the seat of multiple machines, members will learn the fundamentals of demolition. Machines that will be used during this class may include excavators with breakers and processors, loaders with buckets and forks, a concrete crusher, a screen plant that is able to process multiple material types and sizes as well as skidloaders using multiple attachments.

*Prerequisites:* One of the following: Skidsteer proficiency, Excavator proficiency, Combination proficiency or completion of an Introduction to Excavators or Introduction to Combination Backhoe class. **Note: 8 member max per class.**

Date	Start Time	Location
Feb. 6-10, 2023	7:00 A.M.	1141
Feb. 13-17, 2023	7:00 A.M.	1141
Feb. 20-24, 2023	7:00 A.M.	1141
Feb. 27-Mar. 3, 2023	7:00 A.M.	1141
Mar. 6-10, 2023	7:00 A.M.	1141

# Introduction to Excavators

This 40-hour class is designed for operators with minimal excavator experience. This course will include a blend of classroom discussion and hands-on training designed to enhance your skills throughout the week. This course begins in the classroom and covers several areas of safety, including machine safety, trench safety, and utility safety. We will move into the machine and work on drills designed to gain basic control of the machine and finish with basic ditching exercises and truck loading (weather permitting). **Note: 8 member max per class.**

Date	Start Time	Location
Nov. 7-11, 2022	7:00 A.M.	1133
Dec. 12-16, 2022	7:00 A.M.	1133
Jan. 2-6, 2023	7:00 A.M.	1133
Feb. 20-24, 2023	7:00 A.M.	1133
Feb. 27-Mar. 3, 2023	7:00 A.M.	1133
Apr. 3-7, 2023	7:00 A.M.	1133

# Mass Dirt

This class will cover most aspects of a mass dirt job site. During this 40-hour class members will be instructed on a wide variety of dirt equipment. Machines being used in this class include excavators, articulating dump trucks, large dozers, scrapers and compactors. Members will run most, if not all, of these machines throughout the week. Some of the job site scenarios that may be performed during the week include road building, ditch work, pond excavation and building pad construction. *Prerequisites:* One of the following: Dozer proficiency, Excavator proficiency, Introduction to Excavator class or Introduction to Dozer class. **Note: 8 member max per class.**

Date	Start Time	Location
Nov. 7-11, 2022	7:00 A.M.	1140
Dec. 12-16, 2022	7:00 A.M.	1140
Jan. 16-20, 2023	7:00 A.M.	1140
Feb. 13-17, 2023	7:00 A.M.	1140
Mar. 6-10, 2023	7:00 A.M.	1140

## Introduction to Combination Backhoe

This 40-hour class is designed for operators with minimal combination backhoe experience. This course will include a blend of classroom discussion and hands-on training designed to enhance your skills throughout the week. This class will start off in the classroom covering safety in and around the machine, after which we will move into the machine and work on drills designed to gain basic control of the bucket and backhoe finishing with ditching, handling street plates, and utility digs. **Note: 8 member max per class.**

Date	Start Time	Location
Oct. 31-Nov. 4, 2022	7:00 A.M.	1141
Dec. 5-9, 2022	7:00 A.M.	1145
Jan. 2-6, 2023	7:00 A.M.	1145
Jan. 9-13, 2023	7:00 A.M.	1145
Jan. 16-20, 2023	7:00 A.M.	1145
Feb. 6-10, 2023	7:00 A.M.	1145
Feb. 27-Mar. 3, 2023	7:00 A.M.	1145
Mar. 13-17, 2023	7:00 A.M.	1145
Apr. 10-14, 2023	7:00 A.M.	1145

## Introduction to Gradalls

This 40-hour class is designed for operators with no Gradall experience. This course will include minimal classroom with the majority of time being hands-on. The course will cover pre-operational checks and inspections, safety, daily maintenance, familiarity with control functions, basic operational techniques including machine placement, barrier wall (loading, placement and handling), ditching, truck loading, patch removal, and grading. *Prerequisites for this course are: Class B CDL and basic knowledge of excavation and road work.* **Note: 8 member max per class.**

Date	Start Time	Location
Mar. 6-10, 2023	7:00 A.M.	1143
Mar. 13-17, 2023	7:00 A.M.	1143
Mar. 20-24, 2023	7:00 A.M.	1143
Mar. 27-31, 2023	7:00 A.M.	1143

## Introduction to Hydro-Vac Excavation

This 40-hour course is designed to provide a program for operators to develop the skills needed to operate a hydro “vacuum” excavation machine. Each student will demonstrate utility locating “potholing” and trenching techniques. Material covered will include, how a hydro excavator system works, safety concerns, DOT regulations and inspections, OSHA excavation regulations and systems trouble shooting. Due to state licensing requirements, members should have a CDL with “Tanker” endorsement prior to attending this class.

Date	Start Time	Location
Feb. 13-17, 2023	7:00 A.M.	1149
Feb. 20-24, 2023	7:00 A.M.	1149
Feb. 27-Mar. 3, 2023	7:00 A.M.	1149
Mar. 6-10, 2023	7:00 A.M.	1149

# Dirt Equipment Certification

## Advanced Excavator Techniques

This class is designed for the experienced excavator operator. Members who register for this class must be proficient and have a minimum of 4,000 hours of job site experience on a track backhoe within the last 10 years. Classroom topics include OSHA related safety topics, terms and definitions, operating procedures and techniques, rigging and load charts, soil mechanics, understanding grades, pipe lasers and laser set-up, excavating in the presence of or around underground utilities, all types of related excavation work, demolition, UST removal, sloping and the use of trench boxes (ditch shields). Members must pass a written test before they take the practical test. Both the written and practical tests must be passed to become excavator certified.

Date	Start Time	Location
Nov. 21-23, 2022	7:00 A.M.	1133
Dec. 19-21, 2022	7:00 A.M.	1133
Apr. 10-12, 2023	7:00 A.M.	1133

## Advanced Dozer Techniques

This 4-hour class is for the experienced finish dozer operator. Members who register for this class must be proficient and have at least 4,000 hours of job site experience on a dozer within the last 10 years. Classroom topics such as terms and definitions, safety, job planning, grading methods and techniques, grade stakes and print reading, laser setup and use are all covered in the classroom. Members must pass the written test before they take the practical test. Both the written and practical tests must be passed to become dozer-certified.

Date	Start Time	Location
Dec. 22, 2022	7:00 A.M.	1142
Apr. 13, 2023	7:00 A.M.	1142

## Advanced Blade Techniques

This 4-hour class is for the experienced blade operator. Members who register for this class must already be proficient and have 4,000 hours of job site experience on a blade within the last 10 years. Topics covered include terms and definitions, safety, job planning, grading methods and techniques, grade stakes and print reading, laser setup and use are all covered in the classroom. Members must pass the written test before they take the practical test. Both the written and practical tests must be passed to become blade certified.

Date	Start Time	Location
Dec. 22, 2022	11:30 A.M.	1142
Apr. 13, 2023	11:30 A.M.	1142

# Road Construction

## Introduction to Asphalt Paving and Rolling

In this 40-hour course, members will learn the basic components and setup procedures associated with asphalt pavers. Safety, setup, and proper use of the machines will be the main focus of this class. Members will also learn about the different asphalt rollers and rolling patterns. This course will include a blend of classroom and hands-on training.

**Note: 10 member max per class.**

Date	Start Time	Location
Dec. 12-16, 2022	7:00 A.M.	2123
Jan. 2-6, 2023	7:00 A.M.	2123
Jan. 9-13, 2023	7:00 A.M.	2123
Feb. 6-10, 2023	7:00 A.M.	2123
Feb. 27-Mar. 3, 2023	7:00 A.M.	2123

## Fundamentals of Asphalt Paving and Rolling

This 40-hour class is a continuation of where the Introduction to Asphalt Paving and Rolling class left off. Members will learn how to pave and roll around different obstacles such as light poles, manholes and different types of curbs. Students will be focusing on creating and rolling different types of joints used on mainline jobs as well as small jobs such as driveways and parking lots. Members will also learn how to pave and roll intersections and cul-de-sac's. The course will include some classroom work, but will mainly be hands-on training. *Prerequisite:* Introduction to Paving and Rolling class or 500 hours working on an asphalt paving crew. **Note: 10 member max per class.**

Date	Start Time	Location
Feb. 13-17, 2023	7:00 A.M.	2123
Mar. 6-10, 2023	7:00 A.M.	2123

## Introduction to Road Grinding

This class is an introduction to the controlled cold milling of pavement to restore the surface to a specified profile. Bumps, ruts, and other surface irregularities are removed, leaving a uniform textured surface. This is an introductory course designed for the individual with little to no experience in this field. This course will include classroom as well as hands-on training.

Date	Start Time	Location
Dec. 19-23, 2022	7:00 A.M.	2122
Jan. 2-6, 2023	7:00 A.M.	2122
Jan. 9-13, 2023	7:00 A.M.	2122
Jan. 23-27, 2023	7:00 A.M.	2122

## Intro to Material Transfer Vehicles & Road Wideners

In this 24-hour class, members will be introduced to material transfer vehicles (shuttle buggies) and road wideners. Through a combination of lecture and hands-on training, members will learn about safety, set up, operation and how these machines are used on a variety of road jobs today.

Date	Start Time	Location
Feb. 20-22, 2023	7:00 A.M.	2123
Mar.13-15, 2023	7:00 A.M.	2123

## Concrete Pumping and Belt Placement

This 40-hour course will be offered to members who would like to work with and learn about modern concrete pumping systems. Members will learn to work with various applications, components, outputs, pump capacities and line pressures that are associated with truck mounted pumps. Safe and efficient machine setup, assembly of the piping, start-up, operating the pump, slump mixture, blockages, preventive maintenance and cleanout will all be covered during the week. Members must have a CDL to attend this class.

Date	Start Time	Location
Dec. 12-16, 2022	7:00 A.M.	1149
Jan. 16-20, 2023	7:00 A.M.	1149
Feb. 6-10, 2023	7:00 A.M.	1149
Mar. 20-24, 2023	7:00 A.M.	1149
Apr. 10-14, 2023	7:00 A.M.	1149

## Introduction to Concrete Plants \*

This 40-hour class is designed to enable members to identify types of concrete plants, describe plant components, personnel and safety concerns. Members will be able to explain different characteristics of concrete, list all integral parts of a concrete plant and their function in order to familiarize themselves and reduce risk. This is an entry level class for members with little to no concrete plant experience. This introduction class will be a blend of classroom lectures and a plant tour.  
**5 member max per class**

### Date

*\* Course will be offered on an as-needed basis. Please contact ASIP to express interest.*

## Assistant Plant Operator \*

This is a 40-hour class is designed to increase the skill level of existing assistant plant operators and enable new participants to fill the assistant plant operator position on concrete plants. Members will learn maintenance and lube procedures, inspection and frequency, start up and shut down procedures, resolve common repair items. Members will also learn how to order product needed and identify when running low. This class will cover cold weather protection and how to operate cement storage box.  
**5 member max per class**

### Date

*\* Course will be offered on an as-needed basis. Please contact ASIP to express interest.*

# Site Work, Staking, GPS, Drones

## Grade Stakes, Layout and Plan Reading

This class is designed to help members develop and utilize the skills involved in job site construction. Members will be trained to read and set grade stakes, learn how to read and interpret blueprints as well as lay out a job site based on criteria given. As part of this class, members may use a laser, transit, hand level, and various other instruments to develop basic site work skills. Some of the exercises to be performed will be basic computations and arithmetic, job site layout and instrument set up.

Date	Start Time	Location
Nov. 14-18, 2022	7:00 A.M.	1142
Jan. 3-6, 2023**	7:00 A.M.	1142
Feb. 27- Mar. 3, 2023	7:00 A.M.	1142
Mar. 27-31, 2023	7:00 A.M.	1142

\*\* This class will be taught in four, 10-hour days.

## Introduction to Digital Take-Off

This course explores the knowledge needed to utilize take-off hardware and software to calculate volumetric calculations. Students will utilize skills relating to grade stakes, plan reading, layout, global positioning systems, metric and mathematical computations.

Date	Start Time	Location
Feb. 20, 2023	7:00 A.M.	2115

## GPS: Survey and Rover Pole

This 40-hour class will introduce members to Topcon, Trimble and Leica GPS survey equipment. Members will be trained how to set up a rover pole, controller, and base station as well as learn how to use the software associated with each controller. Through a combination of lecture and hands-on exercises, while using the equipment provided, members will calibrate a job site, establish control points, shoot topographical elevations, transfer GPS information to grade stakes as well as use other functions in the controller to layout a jobsite and compute distances and quantities.

Date	Start Time	Location
Jan. 9-13, 2023	7:00 A.M.	1142
Feb. 20-24, 2023	7:00 A.M.	1142
Apr. 3-7, 2023	7:00 A.M.	1142

## GPS and Machine Control

In this 40-hour class intended for seasoned dozer operators, members will be trained to use Topcon, Trimble and Leica GPS machine control hardware and software. Through lecture and hands-on exercises, members will learn how to navigate the machine interface, perform grading tasks, transfer files between equipment as well as basic troubleshooting and maintenance. In the event of inclement weather, class will be held indoors where the use of robotic total stations and simulators will be used to supplement the hands-on portion of the class. *Prerequisite:* Members need a minimum of 1,000 hours operating a dozer in the last 5 years.

Date	Start Time	Location
Nov. 28 - Dec. 2, 2022	7:00 A.M.	1142
Feb. 27 - Mar. 3, 2023	7:00 A.M.	1142
Mar. 6-10, 2023	7:00 A.M.	1142
Mar. 13-17, 2023	7:00 A.M.	1142
Mar. 20-24, 2023	7:00 A.M.	1142

## Drone Level 1

This course provides operators with the knowledge required to obtain an FAA unmanned aerial system remote pilot certificate and develop the skills needed to safely operate a UAV commercially. Each member will demonstrate an understanding of FAA Part 107 regulations and testing procedures. The material covered in this course includes regulations, specific techniques used on construction and inspection sites and basic flight procedures. Upon completion of this course, student will be able to: identify different types of drone missions used for construction, understand the options for processing data, demonstrate basic drone flying competency and take and pass the FAA Part 107 exam.

Date	Start Time	Location
Feb. 20-24, 2023	7:00 A.M.	1143

## Drone Level 2

This course provides operators with the skills to use drones for construction applications. Materials covered in this course will include specific techniques used on construction sites, advanced flight procedures used in inspections, automated data collection for surveying applications, photometric data processing and choosing payloads for specific mission parameters. *Prerequisite:* Member must have taken the Drone Level 1 course and be in the process of testing with the FAA.

Date	Start Time	Location
Mar. 20-24, 2023	7:00 A.M.	1143

# OECP Certification Test Dates

## Written Examinations

Date	Start Time	Location
Oct. 29, 2022	8:00 A.M.	1140
Dec. 10, 2022	8:00 A.M.	1140
Jan. 7, 2023	8:00 A.M.	1140
Feb. 4, 2023	8:00 A.M.	1140
Feb. 25, 2023	8:00 A.M.	1140
Mar. 25, 2023	8:00 A.M.	1140
Apr. 22, 2023	8:00 A.M.	1140

## Practical Examinations

Date	Start Time	Location
Oct. 22, 2022	7:00 A.M.	1140
Nov. 12, 2022	7:00 A.M.	1140
Feb. 18, 2023	7:00 A.M.	1140
Mar. 11, 2023	7:00 A.M.	1140
Apr. 8, 2023	7:00 A.M.	1140

## Overhead Practical Exams

Date	Start Time	Location
Oct. 22, 2022	7:00 A.M.	1140
Nov. 12, 2022	7:00 A.M.	1140
Feb. 18, 2023	7:00 A.M.	1140

*\* More testing dates may be added throughout the training season. Please call the training site Certification Department at (815) 722-3201 for more information on OECP testing.*

# Crane Department

## Introduction to Cranes

This 40 hour class has been designed as an entry level crane class for the member looking to possibly become a crane operator. Topics to be covered in this class included types of cranes, components, preventative maintenance, basic rigging and signaling. The Qualified Signal Person Safety Training is included in this class. **Note: 9 member max per class.**

Date	Start Time	Location
Nov. 14-18, 2022	7:00 A.M.	2023
Dec. 5-9, 2022	7:00 A.M.	2023
Dec. 12-16, 2022	7:00 A.M.	2023
Dec. 19-23, 2022	7:00 A.M.	2023
Jan. 16-20, 2023	7:00 A.M.	2023
Feb. 6-10, 2023	7:00 A.M.	2023
Feb. 13-17, 2023	7:00 A.M.	2023
Mar. 13-17, 2023	7:00 A.M.	2023
Mar. 20-24, 2023	7:00 A.M.	2023
Mar. 27-31, 2023	7:00 A.M.	2023

## Introduction to Tower Cranes \*

This class is an introduction to tower cranes. This class will be run on an as needed basis based on interest from the members. prerequisites for the class are an OECP license and 2000 hours of documented crane experience in the last 5 years.

### Date

*\* Course will be offered on an as-needed basis. Please contact ASIP to express interest.*

## Fundamentals of Hoisting and Rigging

This 80-hour class is designed for the beginner crane operator. Topics will include various aspects of craning, such as wire rope and rigging, proper setup procedures, load moment indicator (LMI) programming, load chart reading including calculations and deductions, operator responsibilities, assembly/disassembly and safe work practices. The class time is divided equally between classroom and hands-on training for hydraulic and friction cranes. *Prerequisite:* Introduction to Cranes or previously taken Fundamentals of Hoisting and Rigging. **Note: 9 member max per class.**

Date	Start Time	Location
Oct. 31-Nov. 11, 2022	7:00 A.M.	2023
Jan. 2-13, 2023	7:00 A.M.	2023
Jan. 23-Feb. 3, 2023	7:00 A.M.	2023
Feb. 27-Mar. 10, 2023	7:00 A.M.	2023
Apr. 3-14, 2023	7:00 A.M.	2023

# Advanced Hoisting and Rigging

This 40-hour class is designed around the crane operator looking to expand his or her knowledge and job type experience. The class consists of job-based experiences with operators working as a team. Each task must be completed on time and will be evaluated upon completion. All members attending this class will receive a Certificate of Completion. *Prerequisites:* Crane certified (OECP, Local 150 or City of Chicago) or prior completion of Fundamentals Hoisting and Rigging (80 Hour class). **Note: 6 member max per class.**

Date	Start Time	Location
Dec. 12-16, 2022	7:00 A.M.	2025
Jan. 16-20, 2023	7:00 A.M.	2025
Mar. 13-17, 2023	7:00 A.M.	2025
Apr. 17-21, 2023	7:00 A.M.	2025

# Principles of Friction Cranes

This 40-hour class is devoted to Crawler type Friction Cranes. Topics covered will be safety, maintenance, and operation. The different applications of Friction Cranes will also be covered. Fundamentals of Hoisting and Rigging is a prerequisite for this class. **Note: 6 member max per class.**

Date	Start Time	Location
Oct. 17-21, 2022	7:00 A.M.	2025
Feb. 20-24, 2023	7:00 A.M.	2025
Apr. 3-7, 2023	7:00 A.M.	2025

## Signal Person Safety Training

This class was developed to meet the new OSHA standard CC 1926.1428 Signal Person Qualification. This new standard is going to require any person signaling a crane to be a Qualified Signal Person and they will need documentation of taking both a written and practical examination. After successfully completing this class, a member would meet the requirements of a qualified signal person. The curriculum is all classroom based and will cover topics such as: hand signals, voice signals, power line safety, crane dynamics and more. Both a written and practical exam will be administered after the completion of the course.

Date	Start Time	Location
Nov. 17, 2022	7:00 A.M.	2023
Dec. 8, 2022	7:00 A.M.	2023
Dec. 15, 2022	7:00 A.M.	2023
Dec. 22, 2022	7:00 A.M.	2023
Jan. 19, 2023	7:00 A.M.	2023
Feb. 9, 2023	7:00 A.M.	2023
Feb. 16, 2023	7:00 A.M.	2023
Mar. 16, 2023	7:00 A.M.	2023
Mar. 23, 2023	7:00 A.M.	2023
Mar. 30, 2023	7:00 A.M.	2023

## Rigging Person Safety Training

This 24-hour safety training class will provide you with a safety training certificate to help the contractor qualify you as a rigger. Topics covered will be selection and inspection of rigging equipment, types of hitches, rigging hardware, specialty attachments, and all applicable OSHA standards. In order to successfully pass this course, you must attend all three days of class, pass a written assessment, pass a practical inspection, and complete hands-on practical rigging exercises in the crane field. *Prerequisite:* Signal Person Safety Training.

Date	Start Time	Location
Oct. 24-26, 2022	7:00 A.M.	2025
Oct. 31-Nov. 2, 2022	7:00 A.M.	2025
Nov. 21-23, 2022	7:00 A.M.	2025
Dec. 19-21, 2022	7:00 A.M.	2025
Feb. 13-15, 2023	7:00 A.M.	2025
Mar. 6-8, 2023	7:00 A.M.	2025

## Mobile Crane

This 40-hour class is designed for members with 1,000 hours or more of crane related experience who would like to pursue Crane Certification. The curriculum is primarily classroom-based, offering little hands-on training. Course instructors will cover subjects pertaining to crane types, nomenclature/components, crane setup, and various crane accidents. The OSHA and ANSI standards will be covered with emphasis on power line safety, suspended personal platforms, and crane inspections, including shift, monthly, and annual. Other key topics include wire rope and rigging, hand signals, and principles of operation. Crane Math and load charts have been removed due to time constraints. Both are now available as separate courses in this catalog.

Date	Start Time	Location
Oct. 24-28, 2022	7:00 A.M.	2024
Dec. 5-9, 2022	7:00 A.M.	2024
Jan. 2-6, 2023	7:00 A.M.	2024
Jan. 30-Feb. 3, 2023	7:00 A.M.	2024
Feb. 20-24, 2023	7:00 A.M.	2024
Mar. 20-24, 2023	7:00 A.M.	2024
Apr. 17-21, 2023	7:00 A.M.	2024

## Crane Math and Load Charts

This 16-hour course was created for experienced and aspiring crane operators. The topics that will be covered include: working with percentages, fractions, decimals, conversions, and estimating weights through the use of standardized formulas. These skills will be taught with and without the use of calculators as the use of calculators is prohibited during certification exams. We will cover notes interpretation along with understanding and the utilization of load charts and range diagrams. We will utilize charts from various manufacturers and different crane types in this class. This class is recommended for those members preparing for crane certification.

Date	Start Time	Location
Oct. 17-18, 2022	7:00 A.M.	2024
Nov. 14-15, 2022	7:00 A.M.	2024
Jan. 9-10, 2023	7:00 A.M.	2024
Jan. 23-24, 2023	7:00 A.M.	2024
Feb. 6-7, 2023	7:00 A.M.	2024
Apr. 10-11, 2023	7:00 A.M.	2024

## Liebherr 1095 Assembly/Disassembly

This class is designed to introduce our members to the 1095 Liebherr truck crane. Throughout various hands-on exercises our members will set up, break down and operate the crane. This class is intended

for members looking to familiarize themselves with Liebherr cranes and the new technology that is used during the assembly, disassembly and operation of the machine. **Note: Max 10 members per class.**

Date	Start Time	Location
Oct. 10-14, 2022	7:00 A.M.	2025

# Heavy Equipment Technician Classes

## Electrical 1

This 20-hour course is designed for the member new to electrical circuits. This class will look into the “Series” portion of electrical circuits. Use of digital multi-meters and electrical schematics will be covered in this course. There will be a balance of classroom

and hands-on training provided. This class will be taught in 2 ½ days. This class starts on a Monday and will run 7 A.M. - 3:30 P.M. Monday and Tuesday and will end at 11:00 A.M. on Wednesday.

Date	Start Time	Location
Oct. 24-26, 2022	7:00 A.M.	1054
Feb. 20-22, 2023	7:00 A.M.	1054

## Electrical 2

This 20-hour course is designed for the member that has some experience with electrical circuits. This class will look into the “Parallel” and “Series/Parallel” portion of electrical circuits. There will be discussion of connector repair and hands-on machine

troubleshooting in this course. There will be a balance of classroom and hands-on training provided. This class will be taught in 2 ½ days. This class starts on a Wednesday and will run 11:30 A.M. - 3:30 P.M. on Wednesday then will run 7:00 A.M. - 3:30 P.M. Thursday and Friday.

Date	Start Time	Location
Oct. 26-28, 2022	11:30 A.M.	1054
Feb. 22-24, 2023	11:30 A.M.	1054

## Electrical 3

This 20-hour class focuses heavily on troubleshooting electrical problems using schematics. Electrical I & II classes are strongly recommended prior to taking this course. This class will be taught in 2 ½ days. This class starts on a Monday and will run 7 A.M. - 3:30 P.M. Monday and Tuesday and will end at 11:00 A.M. on Wednesday.

Date	Start Time	Location
Oct. 31-Nov. 2, 2022	7:00 A.M.	1054
Feb. 27-Mar. 1, 2023	7:00 A.M.	1054

# Diesel Fuel Systems

This is a 20-hour course that covers mechanical diesel fuel systems. This course covers system design, theory of operation, troubleshooting techniques and discussion of repair procedures. There will be a balance of classroom and hands-on training. This class will be taught in 2 ½ days. This class starts on a Monday and will run 7 A.M. - 3:30 P.M. Monday and Tuesday and will end at 11:00 A.M. on Wednesday.

Date	Start Time	Location
Nov. 28-30, 2022	7:00 A.M.	1034
Mar. 13-15, 2023	7:00 A.M.	1034

# Hydraulics I

This 20-hour course will give the student a strong foundation in hydraulics as they relate to heavy equipment repair. There will be discussion on the components that make up the basic hydraulic system as well as use of schematics to understand hydraulic principles. There will be a balance of classroom and hands-on training. This class will be taught in 2 ½ days. This class starts on a Monday and will run 7 A.M. - 3:30 P.M. Monday and Tuesday and will end at 11:00 A.M. on Wednesday.

Date	Start Time	Location
Nov. 7-9, 2022	7:00 A.M.	1049
Feb. 6-8, 2023	7:00 A.M.	1049

# Hydraulics II

This is a 20-hour course that will give the student a strong foundation of hydraulic schematics as they relate to heavy equipment repair. There will be a balance of classroom and hands-on training. This class will be taught in 2 ½ days. This class starts on a Wednesday and will run 11:30 A.M. - 3:30 P.M. on Wednesday then will run 7:00 A.M. - 3:30 P.M. Thursday and Friday.

Date	Start Time	Location
Nov. 9-11, 2022	11:30 A.M.	1049
Feb. 8-10, 2023	11:30 A.M.	1049

# Electronic Engine Controls

This 20-hour course covers electronic diesel fuel system design, theory of operation, troubleshooting techniques and discussion of repair procedures. There will be a balance of classroom and hands-on training. This class will be taught in 2 ½ days. This class starts on a Wednesday and will run 11:30 A.M. - 3:30 P.M. on Wednesday then will run 7:00 A.M. - 3:30 P.M. Thursday and Friday.

Date	Start Time	Location
Nov. 30-Dec. 2, 2022	11:30 A.M.	1034
Mar. 15-17, 2023	11:30 A.M.	1034

# Engine Disassembly and Assembly

This is a 20-hour course that covers disassembly and assembly of diesel engines. This class is entirely hands-on. This class will be taught in 2 ½ days, classes starting on Monday will begin at 7 A.M. and those starting on Wednesday will begin at 11:30 A.M.

Date	Start Time	Location
Nov. 21-22 2022	7:00 A.M.	1034
Mar. 6-8, 2023	7:00 A.M.	1034

# Mobile Air Conditioning Service and Certification

This 20-hour course is designed to train a technician to properly service mobile air conditioning systems as well as provide them the opportunity to become certified to legally perform mobile air conditioning service work.

Topics covered include: refrigerant types, principles relating to air conditioning, air conditioning components, refrigerant identification, performance testing air conditioning systems, and leak detection. This class starts on a Wednesday and will run 11:30 A.M. - 3:30 P.M. then will run 7:00 A.M. - 3:30 P.M. Thursday and Friday.

Date	Start Time	Location
Mar. 27-29, 2023	7:00 A.M.	1053

## Tier 4 Final

This 20-hour course was designed to explain Tier 4 Final as it relates to diesel engines. This course will cover the operation of the emissions system as well as basic troubleshooting techniques. This class starts on a Monday and will run 7 A.M. - 3:30 P.M. Monday and Tuesday and will end at 11:00 A.M. on Wednesday.

Date	Start Time	Location
Dec. 5-7, 2022	7:00 A.M.	1034
Mar. 8-10, 2023	11:30 A.M.	1034

## Bolt Extraction and Plasma Cutting

This is an 8-hour class focusing on different methods of removing broken bolts as well as plasma cutting, carbon arc gouging and oxy-lance slice rod operations.

Date	Start Time	Location
Nov. 21, 2022	7:00 A.M.	1053
Dec. 22, 2022	7:00 A.M.	1053

# Heavy Equipment Welding Classes

## Shielded Metal Arc Welding (SMAW) 1

This is a 20-hour course covering Stick (SMAW) welding. There will be classroom discussion of equipment, safety, and proper technique. The welding shop portion will include demonstrations of proper technique as well as plenty of practice time. Each section of the course will be limited to twelve journey workers.

Date	Start Time	Location
Dec. 19-21, 2022	7:00 A.M.	1053
Jan. 30-Feb. 1, 2023	7:00 A.M.	1053
Mar. 20-22, 2023	7:00 A.M.	1053

## Shielded Metal Arc Welding 2

This is a 20-hour course focusing on out of position Stick (SMAW) welding. There will be classroom discussion of equipment, safety, and proper technique. The welding shop portion will include demonstrations of proper technique as well as plenty of practice time. Welds can also be tested. **Note: Each section of the course will be limited to 12 members.**

Date	Start Time	Location
Dec. 27-29, 2022	7:00 A.M.	1053
Feb. 1-3, 2023	11:30 A.M.	1053
Mar. 22-24, 2023	11:30 A.M.	1053

## Gas Metal Arc Welding (GMAW)

This is a 20-hour course designed to explain the various modes of weld transfer when using the GMAW process (short circuit, globular, spray and pulsed spray). Also included will be discussions involving power supplies, filler metal, weld troubleshooting, equipment maintenance, and the various gases used with the GMAW process. The students will be instructed in equipment set-up and adjustment along with the proper techniques used when welding with the GMAW process. We will demonstrate flat, horizontal, vertical and overhead welding techniques. The scope of this class will be the welding of mild steel. There will be a balance of classroom and hands-on training.

Date	Start Time	Location
Jan. 9-11, 2023	7:00 A.M.	1053
Feb. 13-15, 2023	7:00 A.M.	1053

## Flux Cored Arc Welding (FCAW)

This is a 20-hour course designed to explain the set-up, adjustment, properties and techniques involved with the FCAW process. The students will use both FCAW-SS (self shielded) and FCAW-GS (gas shielded). Also included will be discussion involving power supplies, filler metals, weld troubleshooting, equipment maintenance and the gas requirements for FCAW-GS. We will demonstrate flat, horizontal, vertical and overhead welding techniques. There will be a balance of classroom and hands-on training.

Date	Start Time	Location
Jan. 11-13, 2023	11:30 A.M.	1053
Feb. 15-17, 2023	11:30 A.M.	1053

# Drilling Classes

## Exploratory Drilling Level 1

This two-week course is designed to provide a program for operators to develop the skills needed to operate a Geotechnical drill rig for soil and rock exploration. Each student will demonstrate basic auger, mud rotary and rock coring drilling techniques. Material covered will include drill rig operation, different drilling methods, drilling method applications, safety, drill rig inspections, routine maintenance and systems trouble shooting.

Date	Start Time	Location
Apr. 17-28, 2023	7:00 A.M.	1143

## Exploratory Drilling Level 2

This two-week course is designed to provide a program for operators with drilling experience to develop the skills needed to operate a Geotechnical drill rig using advanced techniques. Each member will demonstrate Denison soil coring, mud mixing, setting casing, angle drilling and rock coring drilling techniques. Material covered will included drill rig operation, drilling method applications, drilling safety instrumentation and grouting. *Prerequisites:* Exploratory Drill Level 1 or 1000 hours operating a geotechnical drill rig.

**Note: 6 members max per class.**

Date	Start Time	Location
Jan. 30 - Feb. 10, 2023	7:00 A.M.	1143

## Introduction to Geothermal Drilling

This course is designed to provide a program for operators to develop the skills needed to drill and install ground loops for geothermal heating and cooling in residential and commercial ground exchange systems. Each student will demonstrate soils recognition, mud mixing, air rotary drilling, mud rotary drilling, down the hole hammer drilling, setting loops, and geothermal grouting. Material covered will include drilling safety, basic loop design, air and mud drilling methods, setting casing, loop placement and grouting techniques. *Prerequisites:* IGSHPA Accredited Loop Installer; proficiency on a drill rig.

Date	Start Time	Location
Apr. 3-7, 2023	7:00 A.M.	1143

## HDPE Pipe Fusion

This course is designed to provide a program for operators to develop the skills needed to build and install header systems (supply and return) for geothermal heat pumps. Each student will demonstrate basic trenching, pipe fusion, plan reading, pipe layout and fabrication techniques. Material covered will include: digging safety, basic header design, mechanical plan reading, pipe layout, and heat fusion welding techniques. Upon completion of the class, proficiency tests will be available in butt, socket, and saddle fusion of HDPE pipe.

Date	Start Time	Location
Mar. 6-10, 2023	7:00 A.M.	1143

## Introduction to Geothermal Systems \*

This course was designed to provide a program for operators to develop the skills needed to work on geothermal loop field installation. Each student will be introduced to ground loop installation drilling and grouting techniques. Material covered will include: types of heat exchanger systems, loop design, and thermal properties of geological formations. Upon successful completion of this class, students will receive accreditation from the International Ground Source Heat Pump Association (IGSHPA)

Date
* Course will be offered on an as-needed basis. Please contact ASIP to express interest.

## Drilling Mud and Solids Control Systems

The course is designed to assist in the development of skills related to the use of drilling fluids and grouts. Topics covered will be the importance of makeup water, drilling fluids for the water well geothermal and directional drilling industries, fluid testing, fluid troubleshooting, and geothermal and conventional grouting techniques and equipment. Students will be working with and handling the drilling fluid testing equipment, discussing past and current fluid technology, mixing and pumping thermally enhanced grout, and troubleshooting drilling fluid related issues.

Date	Start Time	Location
Feb. 13-17, 2023	7:00 A.M.	1143

## Horizontal Directional Drill - Level 1

This 80-hour class prepares our members for the “trenchless technology” that uses horizontal boring machines for utility work traditionally done with an excavator. This course will include instruction in the principles of directional boring, drilling fluids, pre-planning and set-up, along with hands-on instruction

on a directional boring machine and locating devices. The directional boring operator shares all duties with a small crew, and these duties range from above-ground locating to various physical tasks to maintain, transport and operate the machine. The majority of these jobs require the member to also hold a valid CDL. **Note: 10 member max per class.**

Date	Start Time	Location
Dec. 12-23, 2022	7:00 A.M.	1150
Jan. 23 - Feb. 3, 2023	7:00 A.M.	1150
Mar. 27 - Apr. 7, 2023	7:00 A.M.	1150

## Horizontal Directional Drill - Level 2

This 80-hour class will expand on the principles of safe and productive operation included in the Level I Class and introduce the equipment, work methods and procedures made necessary by the new and innovative applications of the directional drill. Members will learn how to read blueprints

regarding the installation of underground utilities and simulate this installation during the hands-on portion of the class. The hands-on training will include the use of back reamers, mixing and using fluids, setting vaults and drilling around exposed utilities. Applicants **MUST** be proficient on a directional drill and/or locator. The majority of these jobs require the member to also hold a valid CDL. **Note: 10 member max per class.**

Date	Start Time	Location
Feb. 6-17, 2023	7:00 A.M.	1150
Apr. 10-21, 2023	7:00 A.M.	1150

## Caisson Drill Rig Class

This 40 hour course will consist of classroom instruction and hands-on training. Classroom topics will include safety, the effects of various soil types on drill operations and all types of drilling procedures. The hands-on portion of the class will be done using a hydraulic caisson drill rig. **Note: Class size will be limited to 8 members.**

Date	Start Time	Location
Jan. 2-6, 2023	7:00 A.M.	1143
Jan. 9-13, 2023	7:00 A.M.	1143

# Construction Material Inspectors

## Basic Knowledge Courses

### ICC General Requirements Special Inspector

Type	Date	Start Time	Location
Code	Dec. 5, 2022	7:00 A.M.	2034
Code	Jan. 30, 2023	7:00 A.M.	2034
Code	Mar. 6, 2023	7:00 A.M.	2034

### Introduction to Resume Building \*

This course provides members with the skills needed to create a professional resume. A review of proper layout, vocabulary / grammar, and maximizing potential will be discussed. Members will have a chance to create their own resume to be used in real life.

#### Date

*\* Course will be offered on an as needed basis. Please contact ASIP to express interest.*

### Introduction to Interviewing Techniques \*

The course provides members with the tools and confidence for a professional interview with our signatory companies. A review of proper interview etiquette and vocabulary / grammar to use during an interview. Members will have an opportunity to perform mock interviews with instructors.

#### Date

*\* Course will be offered on an as needed basis. Please contact ASIP to express interest.*

## Math 1 - Basic Math

This course will provide members with basic math skills that are used daily in the CBI program. This course will review: conversions, rounding and reporting, order of operations and word problems. Members will be given a practice exam at the end of the class to simulate taking timed exams.

Date	Start Time	Location
Dec. 2, 2022	7:00 A.M.	2034
Jan. 27, 2023	7:00 A.M.	2034
Feb. 27, 2023	7:00 A.M.	2034

## Math 2 - Fractions

This course will provide members with math skills regarding fractions that are used daily in the CBI program. This course will review: proper fractions, addition / subtraction of fractions, and averaging of fractions. Members will be given a practice exam at the end of class to simulate taking timed exams.

Date	Start Time	Location
Dec. 2, 2022	11:30 A.M.	2034
Jan. 27, 2023	11:30 A.M.	2034
Feb. 27, 2023	11:30 A.M.	2034

## Concrete Inspection Courses

### Floor Flatness \*†

#### Dates

\* Course will be offered on an as-needed basis. Please contact ASIP to express interest.

† This course is scheduled and offered by a 3rd party. Please contact ASIP for further information.

### Post Tension Institute Unbonded PT Installer and Inspector - Level 1 & 2 \*†

#### Dates

\* Course will be offered on an as-needed basis. Please contact ASIP to express interest.

† This course is scheduled and offered by a 3rd party. Please contact ASIP for further information.

## Pre-Cast/Prestressed Concrete Institute Plant Quality Control Techniques \*†

### Dates

\* Course will be offered on an as-needed basis. Please contact ASIP to express interest.

† This course is scheduled and offered by a 3rd party. Please contact ASIP for further information.

## Pre-Cast/Prestressed Concrete Institute Certified Field Auditor \*†

### Dates

\* Course will be offered on an as-needed basis. Please contact ASIP to express interest.

† This course is scheduled and offered by a 3rd party. Please contact ASIP for further information.

## Prestressed/Post Tension Concrete Inspection \*

This course will provide members with skills needed to perform field inspections for prestressed / post tension concrete inspection. The course will review: prestressed / post tension concrete inspection, basic blueprints, tendon inspection, and stressing of the tendon. *Prerequisite:* Reinforced Concrete Inspection

### Date

\* Courses will be offered on an as needed basis. Please contact ASIP to express interest.

## ICC Pre-Stressed Concrete Special Inspector \*

Type	Date
Plan & Code*	* Courses will be offered on an as-needed basis. Please contact ASIP to express interest.

\* Prerequisite for the Code class: Members must have taken the Prestressed/Post Tension Concrete Inspection and ICC Reinforced Concrete courses along with having a current ACI Concrete Field Testing Tech Grade 1 certification.

# Reinforced Concrete Inspection

This course will provide members with skills needed to perform field inspections for reinforced concrete through a combination of classroom and hands on experience. The course will review: identifying reinforcing steel, basic blueprint reading, practice performing inspections on reinforcing steel. *Prerequisite:* ACI Concrete Field Testing Tech Grade 1

Date	Start Time	Location
Dec. 5, 2022	7:00 A.M.	2035
Jan. 30, 2023	7:00 A.M.	2035
Mar. 20, 2023	7:00 A.M.	2035

# ICC Reinforced Concrete Special Inspector

## Plan

Date	Start Time	Location
Dec. 6, 2022	7:00 A.M.	2035
Jan. 31, 2023	7:00 A.M.	2035
Mar. 21, 2023	7:00 A.M.	2035

## Code

Date	Start Time	Location
Dec. 7-9, 2022	7:00 A.M.	2035
Feb. 1-3, 2023	7:00 A.M.	2035
Mar. 22-24, 2022	7:00 A.M.	2035

*\*Prerequisite for the Code class: Members must have taken the Reinforced Concrete Inspection course and have a current ACI Concrete Field Testing Tech Grade 1 certification.*

# Masonry Inspection Courses

## Masonry Inspection

This course will provide members with skills needed to perform field inspections for masonry grout and mortar through a combination of classroom and hands on experience. The course will review: masonry construction, basic blueprint reading, grout sampling and inspection, and mortar sampling and inspection.

Date	Start Time	Location
Dec. 19, 2022	7:00 A.M.	2035
Mar. 6, 2023	7:00 A.M.	2035
Apr. 3, 2023	7:00 A.M.	2035

## ICC Structural Masonry Special Inspector

### Plan

Date	Start Time	Location
Dec. 20, 2022	7:00 A.M.	2035
Mar. 7, 2023	7:00 A.M.	2035
Apr. 4, 2023	7:00 A.M.	2035

### Code

Date	Start Time	Location
Dec. 28-30, 2022	7:00 A.M.	2035
Mar. 8-10, 2023	7:00 A.M.	2035
Apr. 5-7, 2023	7:00 A.M.	2035

*\*Prerequisite for the Code class: Members must have taken Masonry Inspection course. Reinforced Concrete Inspection course is recommended.*

# Soils Inspection Courses

## Soils - Classification

This course will provide members with skills needed to perform field inspections for soil classifications through a combination of classroom and hands on experience. The course will review: different soil classifications, visual manual procedure, unified soil classification procedure, both lab and field tests to determine soil properties.

Date	Start Time	Location
Nov. 28-29, 2022	7:00 A.M.	2034
Jan. 23-24, 2023	7:00 A.M.	2034
Feb. 28-Mar. 1, 2023	7:00 A.M.	2034

## Soils - Field Inspection

This course will provide members with skills needed to perform field inspections for soil classifications through a combination of classroom and hands on experience. The course will review: different soil classifications, visual manual procedure, unified soil classification procedure, both lab and field tests to determine soil properties. *Prerequisite:* Soils-Classification

Date	Start Time	Location
Nov. 30-Dec. 1, 2022	7:00 A.M.	2034
Jan. 25-26, 2023	7:00 A.M.	2034
Mar. 2-3, 2023	7:00 A.M.	2034

## ICC Soils Special Inspector

### Plan

Date	Start Time	Location
Dec. 6, 2022	7:00 A.M.	2034
Jan. 31, 2023	7:00 A.M.	2034
Mar. 7, 2023	7:00 A.M.	2034

### Code

Date	Start Time	Location
Dec. 7-9, 2022	7:00 A.M.	2034
Feb. 1-3, 2023	7:00 A.M.	2034
Mar. 8-10, 2023	7:00 A.M.	2034

*\*Prerequisites for the Code class: Members must have taken the Soils-Classification and Soils-Field Inspection courses.*

## Structural Steel Inspection Courses

## AWS - Certified Welding Inspector \*†

### Dates

*\* Course will be offered on an as-needed basis. Please contact ASIP to express interest.*

*† This course is scheduled and offered by a 3rd party. Please contact ASIP for further information.*

## High-Strength Bolting Inspection

This course will provide members with skills needed to perform field inspections on high strength bolts through a combination of classroom and hands on experience. This course will review: installation methods, inspection methods, material identification and verification as well as basic blueprint reading

Date	Start Time	Location
Dec. 12, 2022	7:00 A.M.	2035
Jan. 9, 2023	7:00 A.M.	2035
Mar. 27, 2023	7:00 A.M.	2035

# ICC Structural Steel and Bolting Special Inspector

## Plan

Date	Start Time	Location
Dec. 13, 2022	7:00 A.M.	2035
Jan. 10, 2023	7:00 A.M.	2035
Mar. 28, 2023	7:00 A.M.	2035

## Code

Date	Start Time	Location
Dec. 14-16, 2022	7:00 A.M.	2035
Jan. 11-13, 2023	7:00 A.M.	2035
Mar. 29-31, 2023	7:00 A.M.	2035

*\*Prerequisite for the Code class: Members must have taken the High-Strength Steel Bolting Inspection course.*

## Spray-Applied Fireproofing Inspection

This course will provide members with skills needed to perform field inspections on spray-applied fireproofing through a combination of classroom and hands on experience. This course will review: identifying materials, basic blueprints / submittals, thickness inspection, bond strength testing, adhesion / cohesion testing, and density testing.

Date	Start Time	Location
Dec. 19, 2022	7:00 A.M.	2034
Jan. 16, 2023	7:00 A.M.	2034
Mar. 13, 2023	7:00 A.M.	2034

## ICC Spray-Applied Fireproofing Special Inspector

Type	Date	Start Time	Location
Code & Plan	Dec. 20-22, 2022	7:00 A.M.	2034
Code & Plan	Jan. 17-19, 2023	7:00 A.M.	2034
Code & Plan	Mar. 14-16, 2023	7:00 A.M.	2034

*\*Prerequisite for the Code and Plan classes: Spray-Applied Fireproofing Inspection course.*

## Structural Blueprint Reading

This course will provide members with skill needed to navigate structural blueprints for several types of inspections in the field through a combination of classroom and hands on experience. This course will review: basic understanding of blueprint organization, symbols, notes, details, drawing views.

Date	Start Time	Location
Dec. 12-14, 2022	7:00 A.M.	2034
Jan. 4-6, 2023	7:00 A.M.	2034
Feb. 20-22, 2023	7:00 A.M.	2034

## Welding Symbols

This course will provide members with skills needed to identify and interpret welding symbols. This course will review: joint types, identification of weld symbols and reading welding symbols.

Date	Start Time	Location
Jan. 16, 2023	7:00 A.M.	2035
Feb. 20, 2023	7:00 A.M.	2035

## Welding Blueprints

This course will provide members with skills needed to understand and read weld symbols found on blueprints through a combination of classroom and hands on experience. This course will review: Structural blueprints, Fabrication Shop blueprints and Erector blueprints. *Prerequisite:* Welding Symbols course

Date	Start Time	Location
Jan. 16, 2023	11:30 A.M.	2035
Feb. 20, 2023	11:30 A.M.	2035

## Welding Inspection

This course will provide members with skills needed to perform field inspections on structural welds through a combination of classroom and hands on experience. The course will review: identification of weld types, different inspection methods, basic blueprint, and inspection on welds. *Prerequisite:* Welding Blueprints course

Date	Start Time	Location
Jan. 17, 2023	7:00 A.M.	2035
Feb. 21, 2023	7:00 A.M.	2035

## ICC Structural Welding Special Inspector

### Plan

Date	Start Time	Location
Jan. 18, 2023	7:00 A.M.	2034
Feb. 22, 2023	7:00 A.M.	2034

### Code

Date	Start Time	Location
Jan. 19-21, 2023	7:00 A.M.	2035
Feb. 23-25, 2023	7:00 A.M.	2035

*\*Prerequisites for the Code class: Members must have taken SMAW 1, GMAW 1 and Welding Inspection courses.*

# Introduction and IDOT Courses

ASIP introduction courses give a general overview of inspection responsibilities and go over in depth some of the more challenging sections of the IDOT courses (calculations, charting, table, etc.). These courses are required prior to taking the IDOT courses and the schedule is pending on the IDOT course calendar. Please visit the ASIP website ([www.asiplocal150.org](http://www.asiplocal150.org)) for availability and registration. Please see the below listed links to view the IDOT training schedule and contact ASIP to get registered for classes.

## Introduction to Aggregate Technician

This course will provide members with an introduction / overview of the material covered in the IDOT Aggregate Technician course and go over in depth some of the more challenging sections of the course (calculations, charting, tables, etc); provide members with skills needed to perform QC/QA inspector responsibilities in both the laboratory and field through a combination of classroom and hands on experience.

Date	Start Time	Location
TBD		

## Introduction to Portland Cement Concrete - Level 1

This course will provide members with an introduction / overview of the material covered in the IDOT Portland Cement Concrete Level 1 course and go over in depth some of the more challenging sections of the course (calculations, charting, tables, etc.); provide members with skills needed to perform QC / QA inspector responsibilities in the field through a combination of classroom and hands on experience.

Date	Start Time	Location
TBD		

## Introduction to Portland Cement Concrete - Level 2

This course will provide members with an introduction / overview of the material covered in the IDOT Portland Cement Concrete Level 2 course and go over in depth some of the more challenging sections of the course (calculations, charting, tables, etc.); provide members with skills needed to perform QC/QA inspector responsibilities in both the field and plant through a combination of classroom and hands on experience.

Date	Start Time	Location
TBD		

## Introduction to Portland Cement Concrete - Level 3

This course will provide members with an introduction / overview of the material covered in the IDOT Portland Cement Concrete Level 3 course and go over in depth some of the more challenging sections of the course (calculations, charting, tables, etc.); provide members with skills needed to perform QC/QA inspector responsibilities in both the field and plant through a combination of classroom and hands on experience.

Date	Start Time	Location
TBD		

## Introduction to Hot Mix Asphalt - Level 1

This course will provide members with an introduction / overview of the material covered in the IDOT Hot Mix Asphalt Level 1 course and go over in depth some of the more challenging sections of the course (calculations, charting, tables, etc.); provide members with skills needed to perform QC / QA inspector responsibilities in both the laboratory and field through a combination of classroom and hands on experience.

Date	Start Time	Location
TBD		

## Introduction to Hot Mix Asphalt - Level 2

This course will provide members with an introduction / overview of the material covered in the IDOT Hot Mix Asphalt Level 2 course and go over in depth some of the more challenging sections of the course (calculations, charting, tables, etc.); provide members with skills needed to perform QC / QA inspector responsibilities in both the field and plant through a combination of classroom and hands on experience.

Date	Start Time	Location
TBD		

## Introduction to Hot Mix Asphalt - Level 3

This course will provide members with an introduction / overview of the material covered in the IDOT Hot Mix Asphalt Level 3 course and go over in depth some of the more challenging sections of the course (calculations, charting, tables, etc.); provide members with skills needed to perform QC / QA inspector responsibilities in both the field and plant through a combination of classroom and hands on experience.

Date	Start Time	Location
TBD		

## IDOT Documentation of Contract Quantities provided by Illinois Center for Transportation

# American Concrete Institute (ACI)

## ACI Concrete Field Testing Technician Grade 1

This is a one day course is a review / exam prep immediately followed by the ACI administered certification exam / practical. These class dates are based on the availability of exam dates and may change due to ACI's scheduling.

Date	Start Time	Location
TBD		

ACI Concrete Field Testing Grade 1 will cover all Seven ASTM Standards covered / required by the American Concrete Institute (ACI) to take both the written and practical portions of the ACI Concrete Field Technician Grade 1 Certification. To become certified, you must pass the written exam and all seven practical exams administered by ACI personnel.

*Please check the two websites below for availability of the ACI Proctored Exams and call the Training Center to register for the review session corresponding to the exam date.*

ACI Indiana Chapter: [www.indianaaci.org/certification](http://www.indianaaci.org/certification)

ACI Midwest Resource Center: [www.concrete.org/events/eventscalendar](http://www.concrete.org/events/eventscalendar)

*Please see ASIP Class Reimbursement Policy prior to scheduling individual classes at third party facilities.*

# Commercial Truck Driving

## Driver Loading and Unloading Procedures

This course was developed to give members a basic understanding of the job duties of a driver working at a rental house. Throughout the class, members will be instructed on a wide variety of topics that includes but is not limited to, the hiring process, what is expected of you as the driver, safety and the loading and unloading of different machines.

Date	Start Time	Location
Dec. 5-9, 2022	7:00 A.M.	2034
Jan. 2-6, 2023	7:00 A.M.	2034
Mar. 6-10, 2023	7:00 A.M.	2034
Apr. 3-7, 2023	7:00 A.M.	2034

# MAP & DIRECTIONS

19800 West South Arsenal Road  
Wilmington, IL 60481

## Driving Directions:

From the North: Travel South on I-355. Exit onto I-55 South, and continue to Exit 241. Exit and travel East to Illinois Route 53. Turn left (North) and continue to W. Arsenal Road. Turn right (East). The Training Site will be on your left-hand side.

From the South: Travel North on I-55, and continue to Exit 241. Exit and travel East to Illinois Route 53. Turn left (North) and continue to W. Arsenal Road. Turn right (East). The Training Site will be on your left-hand side.

From the East: Travel West on Wilmington/Peotone Road to Old Chicago Road. Turn right (North) and continue to Quigley/Arsenal Road. Turn left (West). The Training Site will be on your right-hand side.

From the West: Travel East on I-80. Exit onto I-55 South, and continue to Exit 241. Exit and travel East to Illinois Route 53. Turn left (North) and continue to W. Arsenal Road. Turn right (East). The Training Site will be on your left-hand side.

## Welcome to ASIP Local 150

Local 150's training center is situated on 300-plus acres in Wilmington, IL. The center boasts 342,000 square feet of space housing an indoor training area, almost 200 pieces of heavy equipment, 30 classrooms, construction material testing lab, state of the art welding facility, equipment simulator lab, a 200-seat auditorium, and much more. Instructors are available to members six days a week, Monday through Saturday, except holidays.

Local 150 offers four apprenticeship programs: Heavy Equipment Operator, Heavy Equipment Repair Technician, Geothermal/Well Driller, and Construction Material Inspector (Field Inspector). We are currently only accepting applications for Heavy Equipment Repair Technicians. To obtain an application, please go to any one of our [District Halls](#) with your valid driver's license and a \$25 money order to fill out a request for an application packet. See our [FAQ](#) for more information.

We will begin accepting applications for Heavy Equipment Operator, Geothermal/Well Driller and Construction Material Inspector (Field Inspector) during the Fall of 2019.
